Important Notes

- Creating and editing Products must be done at the State Level in Sweed.

Permissions

The Access Group needed to use this feature: **Store Setup / Catalog: Create & Edit**

1. Select "Products" from the menu on the left, under "Store Setup"

The screenshot shows the Sweed POS interface. On the left is a dark teal sidebar menu with the 'Sweed' logo at the top. The menu items are: DASHBOARDS, REPORTS, MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' item is expanded, and the 'Products' sub-item is highlighted with a red rectangle. A red arrow points from this 'Products' item to the main content area. The main content area has a header with 'Tutorials' (dropdown), 'Store time 12:12 PM', and user information 'Jenna Baker'. Below the header is a 'Store Setup' section with 'Products' and 'Variants' tabs. The 'Products' tab is active, showing a list of products. The list has columns: Brand, Quality Line, Name, Category, Subcategory, Product type, Variants, and Strain. The first two products are 'Kiva' (White Chocolate Bar and Smores' Milk Chocolate), both with 5 mg. Other products include 'Verano' (0Reoz, 3.5 g), 'Remedi™' (1:1 Balance, Capsule), 'Moxie' (1:1 Pina Colada, Vape, Cartridge, 0.5 g), 'Terrapin' (1:1 Resolute Remedies 2Oz, Salve), and 'Organic Remedies' (1:1 THC/CBD Nano Emulsion, Capsule, 30 Pack; 1:1 THC/Cbg Nano Emulsion, Capsule, 30 Pack; 1:1 Unscented, Topical, Lotion). At the bottom right, there is a green chat icon with a red '10' badge.

2. Select the "New Product" button

The screenshot shows the Sweed POS interface. On the left is a sidebar with navigation options: DASHBOARDS, REPORTS, MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' section is expanded, showing 'Products' as the active option. The main area displays a 'Products' list with columns: Brand, Quality Line, Name, Category, Subcategory, Product type, Variants, and Strain. A red arrow points to the '+ New Product' button in the top right corner of the list.

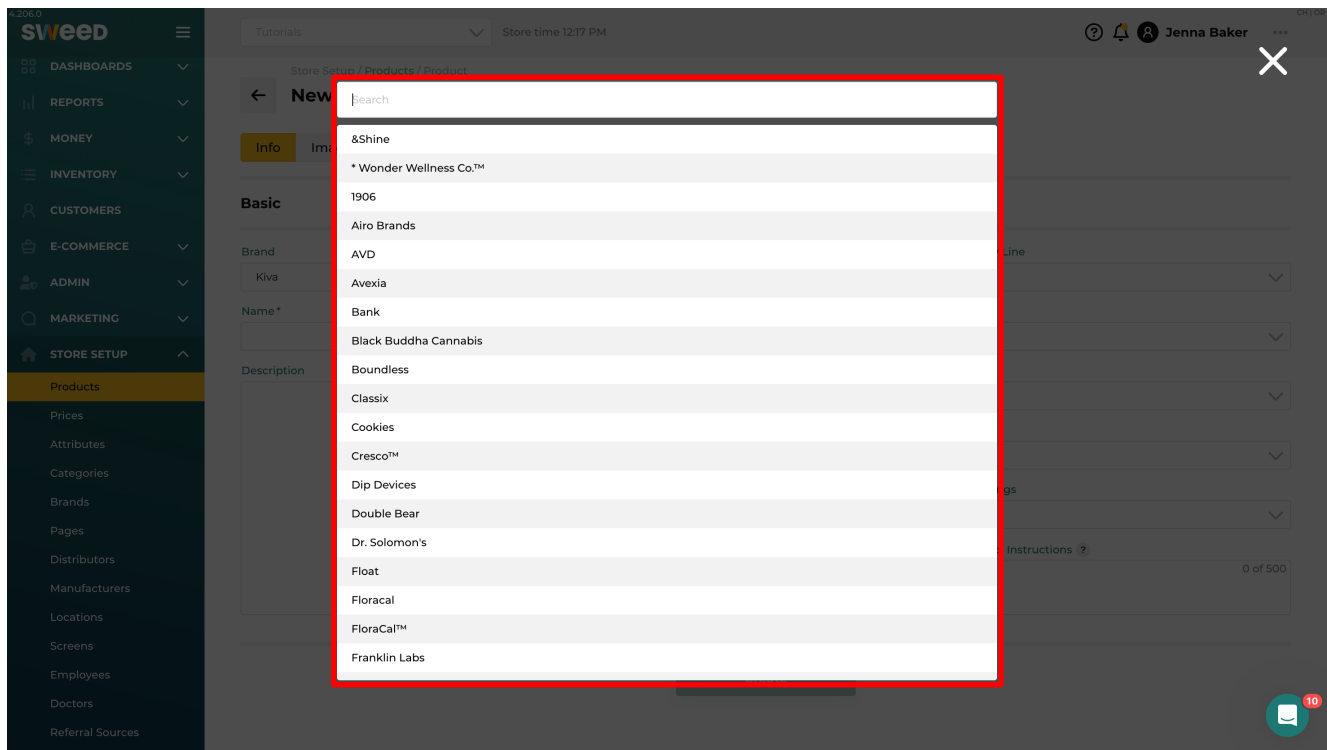

Brand	Quality Line	Name	Category	Subcategory	Product type	Variants	Strain
Kiva		'Birthday Cake' White Chocolate Bar	Edibles			5 mg	
Kiva		'Smores' Milk Chocolate	Edibles			5 mg	
Verano		0Reoz	Flower			3.5 g	0Reoz
Remedi™		1:1 Balance	Edible		Capsule		
Moxie		1:1 Pina Colada	Vape		Cartridge	0.5 g	1:1 Pina Colada
Terrapin		1:1 Resolute Remedies 2Oz	Topical		Salve		
Organic Remedies		1:1 THC/CBD Nano Emulsion	Edible		Capsule	30 Pack	
Organic Remedies		1:1 THC/Cbg Nano Emulsion	Edible		Capsule	30 Pack	
Organic Remedies		1:1 Unscented	Topical		Lotion		

3. Select an option from the "Brand" dropdown to associate the new product with a brand

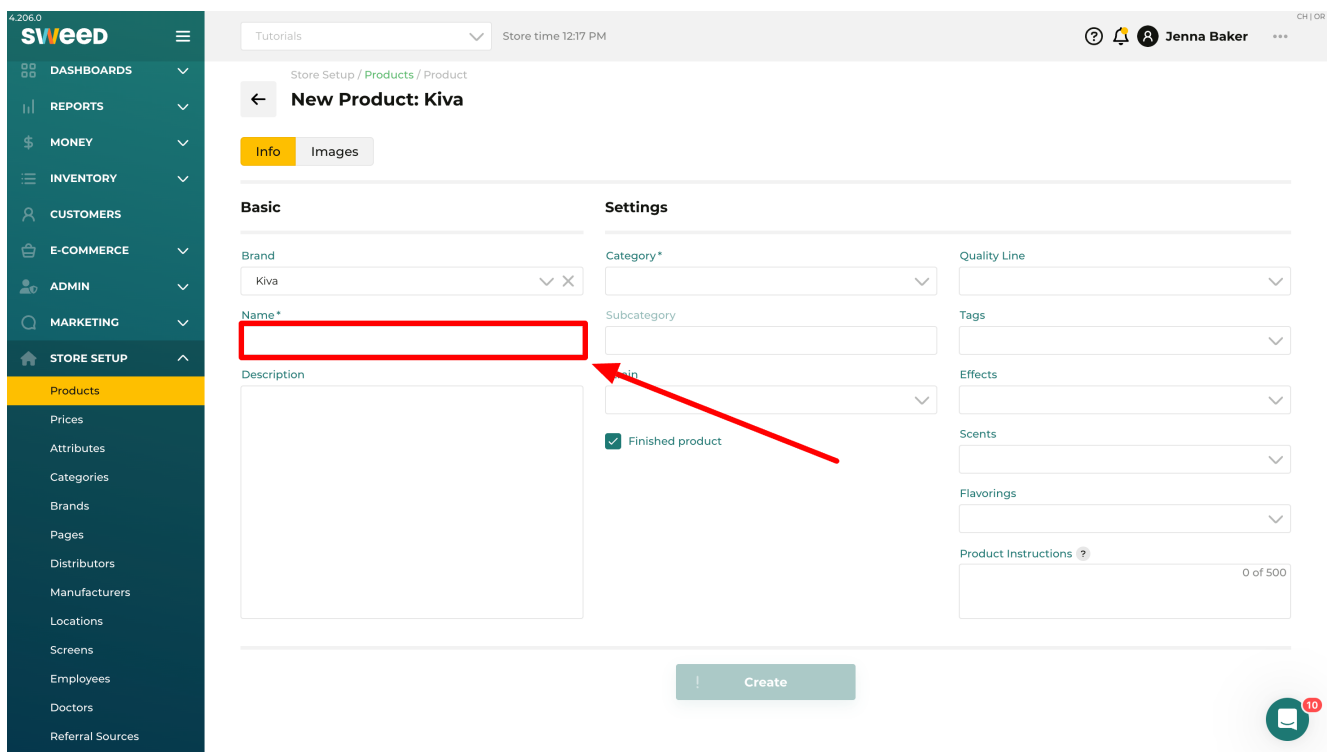

The brand must be created prior to the creation of the product in order to be visible in the "Brand" dropdown. For more information on creating a brand, please see this [article](#).

The screenshot shows the Sweed POS interface for creating a new product. The 'STORE SETUP' section is expanded, and 'Products' is selected. The 'Product' form is displayed, with tabs for 'Info' and 'Images'. The 'Basic' tab is active, showing fields for Brand, Name, Description, Category, Subcategory, Strain, and a checkbox for 'Finished product'. The 'Settings' tab is also visible, showing fields for Quality Line, Tags, Effects, Scents, Flavorings, and Product Instructions. A red box highlights the 'Brand' dropdown menu, and a red arrow points to it from the 'Category' dropdown.

4. Find and select a brand from the options available, or search for a brand in the "Search" field

5. Enter the product name in the "Name" field

6. Enter a description for the newly created product in the "Description" field

This description will appear on the product card on the e-commerce site and the Sweed Cashier.

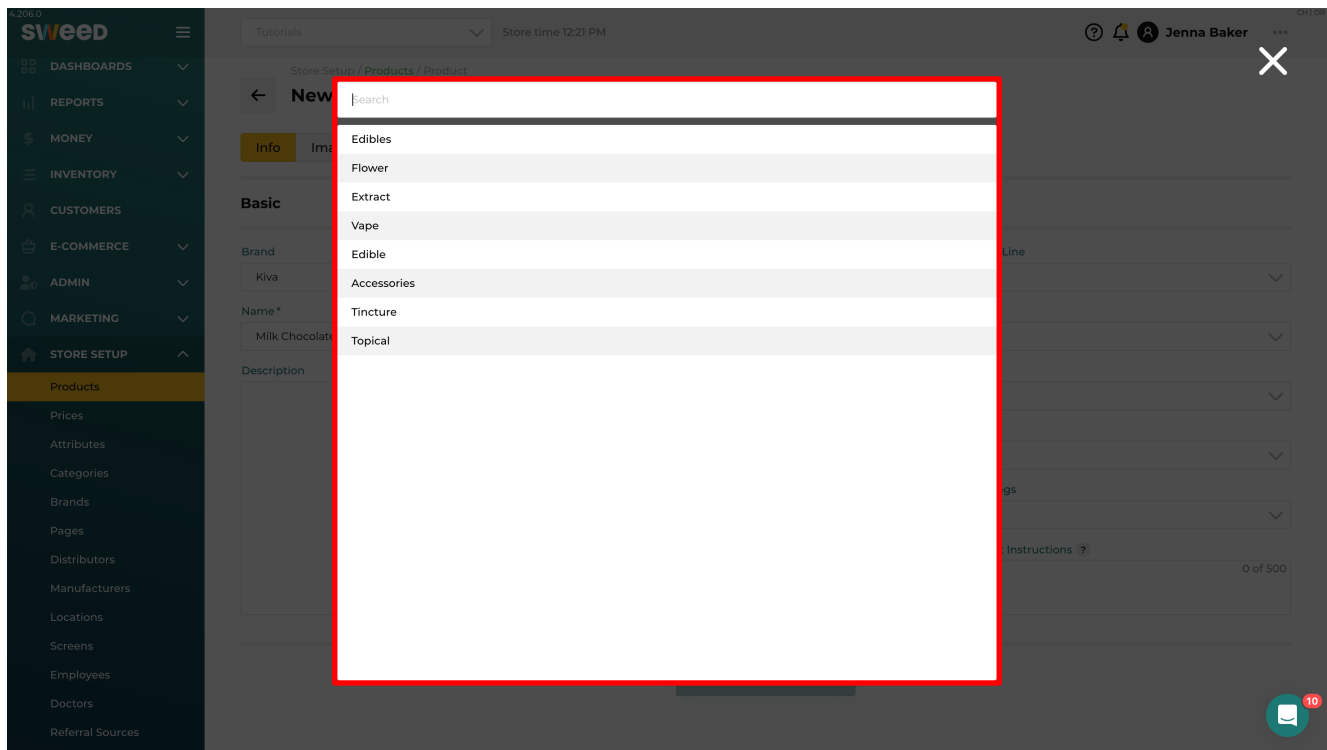

The screenshot shows the Sweed POS interface for creating a new product. The left sidebar contains navigation menus for Dashboards, Reports, Money, Inventory, Customers, E-commerce, Admin, Marketing, and Store Setup. The 'Store Setup' menu is expanded, showing 'Products' as the current selection. The main content area is titled 'New Product: Kiva Milk Chocolate'. It has two tabs: 'Info' (selected) and 'Images'. The 'Basic' section includes fields for Brand (Kiva), Name* (Milk Chocolate), and a large Description field (highlighted with a red rectangle). The 'Settings' section includes dropdowns for Category*, Subcategory, Strain, Quality Line, Tags, Effects, Scents, Flavorings, and Product Instructions. A checkbox for 'Finished product' is checked. A red arrow points from the right towards the Description field.

7. Select the "Category" dropdown to associate the product with a category

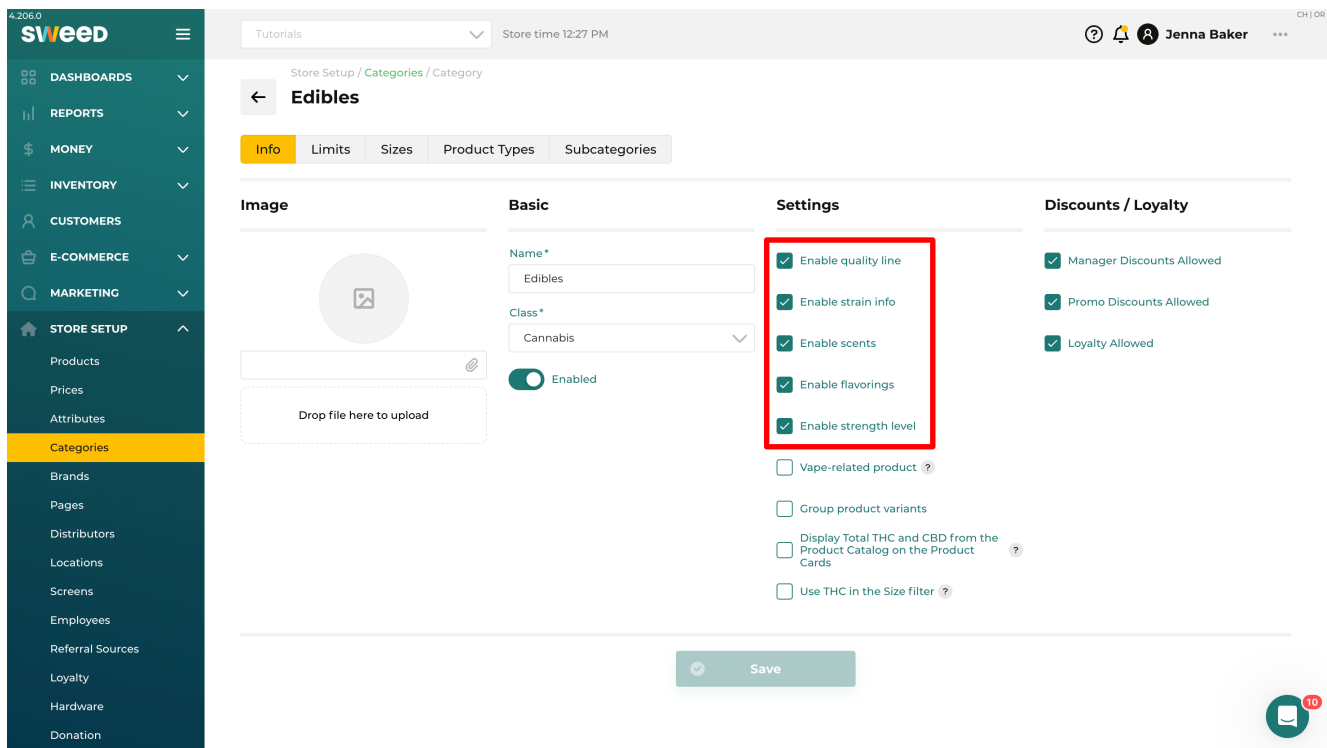

The category must be created prior to the creation of the product in order to be visible in the "Category" dropdown. For more information on creating a category, please see this [article](#).

This screenshot shows the same Sweed POS interface as the previous one, but with the 'Category*' dropdown in the 'Settings' section highlighted by a red rectangle. A red arrow points from the left towards this dropdown. The 'Description' field is now empty. The 'Finished product' checkbox remains checked.

8. Find and select a category from the options presented, or search for a category in the "Search" field

Note: The settings of the selected Category determine which Attribute options are available when creating or editing a product. Attributes like quality line, strain, scent, flavoring, and strength level can only be configured if the Category has the corresponding settings enabled. To adjust these settings, navigate to **[Store Setup > Categories]**, select the desired Category, and check or uncheck the boxes next to each option as needed.

9. Select the "Subcategory" dropdown to associate the product with a subcategory

The subcategory must be created prior to the creation of the product in order to be visible in the "Subcategory" dropdown. For more information on creating a subcategory, please see this [article](#), specifically steps 19-22.

The screenshot shows the 'New Product' form in the Sweed POS system. The left sidebar contains a navigation menu with options like MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' section is expanded, showing 'Products' as the active tab. The main form is titled 'New Product: Kiva Milk Chocolate' and has two tabs: 'Info' (selected) and 'Images'. The form is divided into two main sections: 'Basic' and 'Settings'. In the 'Basic' section, the 'Brand' is set to 'Kiva' and the 'Name' is 'Milk Chocolate'. In the 'Settings' section, the 'Category' is 'Edibles' and the 'Subcategory' dropdown is highlighted with a red box. A red arrow points from the left towards the 'Subcategory' dropdown. Other fields in the 'Settings' section include 'Quality Line', 'Tags', 'Effects', 'Scents', 'Flavorings', and 'Product Instructions'. A 'Create' button is at the bottom right of the form.

10. Select the "Product type" dropdown to associate the product with a product type

The product type must be created prior to the creation of the product in order to be visible in the "Product type" dropdown. For more information on creating a product type, please see this [article](#).

This screenshot is identical to the one above, showing the 'New Product' form for 'Kiva Milk Chocolate'. However, in this view, the 'Product type' dropdown in the 'Settings' section is highlighted with a red box. A red arrow points from the left towards the 'Product type' dropdown. The 'Subcategory' dropdown is no longer highlighted. The rest of the form, including the 'Basic' section and the 'Create' button, remains the same.

11. Select the "Strain" dropdown to associate the product with a strain

The strain must be created prior to the creation of the product in order to be visible in the "Strain" dropdown. For more information on creating a strain, please see this [article](#).

The screenshot shows the 'New Product' form for 'Kiva Milk Chocolate' in the Sweed POS system. The left sidebar contains a navigation menu with options like MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The main form is divided into 'Basic' and 'Settings' sections. In the 'Settings' section, the 'Strain' dropdown is highlighted with a red box, and a red arrow points to it. Other fields include Brand (Kiva), Name (Milk Chocolate), Category (Edibles), Subcategory, Product type, and a checked 'Finished product' checkbox. A 'Create' button is at the bottom right.

12. Select the "Quality Line" dropdown to associate the product with a quality line

The quality line must be created prior to the creation of the product in order to be visible in the "Quality Line" dropdown. For more information on creating a quality line, please see this [article](#).

This screenshot shows the same 'New Product' form, but now the 'Quality Line' dropdown in the 'Settings' section is highlighted with a red box. A red arrow points to it from the 'Strain' dropdown. The 'Strain' dropdown is no longer highlighted. The 'Create' button remains at the bottom right.

13. Select the "Tags" dropdown to associate the product with any tags

The tags must be created prior to the creation of the product in order to be visible in the "Tags" dropdown. For more information on creating tags, please see this [article](#).

The screenshot shows the 'New Product: Kiva Milk Chocolate' form in the Sweed POS system. The left sidebar contains navigation menus for MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' menu is expanded, showing options like Products, Prices, Attributes, Categories, Brands, Pages, Distributors, Manufacturers, Locations, Screens, Employees, Doctors, Referral Sources, Loyalty, and Hardware. The main form is divided into 'Basic' and 'Settings' sections. The 'Basic' section includes fields for Brand (Kiva), Name (Milk Chocolate), and Description. The 'Settings' section includes fields for Category (Edibles), Subcategory, Product type, Strain, and a checkbox for 'Finished product'. On the right side of the 'Settings' section, there are several dropdown menus: Quality Line, Tags, Effects, Scents, Flavorings, and Product Instructions. The 'Effects' dropdown is highlighted with a red box, and a red arrow points to it from the 'Product type' dropdown.

14. Select the "Effects" dropdown to associate effects with the product

The effects must be created prior to the creation of the product in order to be visible in the "Effects" dropdown. For more information on creating effects, please see this [article](#).

The screenshot shows the 'New Product: Kiva Milk Chocolate' form in the Sweed POS system, similar to the previous one. In this view, the 'Scents' dropdown menu on the right side of the 'Settings' section is highlighted with a red box. A red arrow points to it from the 'Product type' dropdown.

15. Select the "Scents" dropdown to associate effects with the product

The scents must be created prior to the creation of the product in order to be visible in the "Scents" dropdown. For more information on creating scents, please see this [article](#).

The screenshot shows the 'New Product: Kiva Milk Chocolate' form in the Sweed POS system. The left sidebar contains navigation menus for MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' menu is expanded, showing 'Products' as the selected option. The main form is divided into 'Basic' and 'Settings' tabs. The 'Settings' tab is active, displaying various dropdown menus and checkboxes. A red box highlights the 'Scents' dropdown menu, and a red arrow points to it from the 'Finished product' checkbox.

17. Select the "Finished product" checkbox if product is a finished good

Note: A finished good is already packed / filled. An unfinished good would be something like flower that needs to be handpicked from a bud jar & packaged before being sold.

The screenshot shows the 'New Product: Kiva Milk Chocolate' form in the Sweed POS system. The left sidebar contains a menu with categories like MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' section is expanded, showing 'Products' as the active tab. The main form is divided into 'Basic' and 'Settings' sections. In the 'Settings' section, the 'Finished product' checkbox is checked and highlighted with a red box. A red arrow points to this checkbox from the left. The 'Create' button is visible at the bottom right of the form.

18. Select the "Create" button

This screenshot shows the same 'New Product: Kiva Milk Chocolate' form. In this step, the 'Finished product' checkbox is still checked, but the focus is on the 'Create' button at the bottom right of the form. The 'Create' button is highlighted with a red box, and a red arrow points to it from the left.

19. Select the "Images" tab

30. For infused SBW (Sell By Weight) flower products, enter the amount of concentrate in milligrams per gram in the Package Infused Concentrate, mg field

This value must be provided and cannot exceed 1000mg/g. The system uses this to split the weight between Concentrate and Flower limits. For example, if a product has 400mg of concentrate per gram, the system allocates 400mg to the Concentrate limit and 600mg to the Flower limit. These values scale automatically based on the quantity

purchased.

The screenshot shows the 'Apex Big Bubba Kush Infused' product setup page in the Sweed POS system. The page is divided into three main sections: Basic, Settings, and Prices (Base price). The 'Package infused concentrate, mg' field in the Settings section is highlighted with a red box, and a red arrow points to it. The 'Name*' field is 'Infused', 'Former name' is empty, 'Status' is 'Active', 'SKU' is 'Ape-Flo-', and 'Barcode' is empty. The 'Default weight' is '1 G', 'Package infused concentrate, mg' is '25', 'Available for purchase type*' is 'Medical and recreational', 'Strength level' is empty, and 'Enabled for E-commerce' is checked. The 'Prices (Base price)' section shows 'Local tiers' and 'Global tiers' both set to 'N/A', 'Local price' is 'N/A', 'Global price*' is '25', 'Local medical price' is 'N/A', 'Global medical price' is empty, 'Distributor' is 'Apex', and 'Wholesale cost, \$*' is '70'. There are buttons for 'Change stock barcodes', 'Reset all barcodes', and 'Save'.

31. Depending on the category selected, you may need to enter the total THC (mg/unit) and total CBD (mg/unit)

This is the total amount of THC and CBD in milligrams contained in a single unit of the product. It must be less than or equal to the "Unit size".

The screenshot shows the 'New variant: Kiva Milk Chocolate' product setup page in the Sweed POS system. The page is divided into three main sections: Basic, Settings, and Prices (Base price). The 'Total THC, mg/unit*' and 'Total CBD, mg/unit*' fields in the Settings section are highlighted with a red box, and a red arrow points to them. The 'Name*' field is 'Select a size to fill', 'Former name' is empty, 'SKU' is empty, and 'External barcode' is empty. The 'Package total size' is '0', 'Units in package*' is '1', 'Unit size (Package total size / Units in package)*' is empty, and 'The 'Unit size' represents Net Weight of a unit (for solid products), Net Volume of a unit (for liquids), or simply pieces for individually counted items. The list could be changed via Store Setup > Categories > Sizes.' The 'Prices (Base price)' section shows 'Local tiers' and 'Global tiers' both set to 'Select a size to fill', 'Local price' is 'N/A', 'Global price*' is 'Select a size to fill', 'Local medical price' is 'N/A', 'Global medical price' is 'Select a size to fill', and 'Strength level' is empty. There is a button for 'Create identical distributor product'.

32. Depending on the category selected, you may have the option to enter the total THC, mg/serving

This is the total amount of THC in milligrams per serving. Serving size is the recommended amount of the product's THC that should be consumed in a single sitting. In NV, this value is printed on medical labels.

Note: This field is only available for products with a Cannabinoid Weight Based (CWB) limit type.

The screenshot shows the 'New variant: Kiva Milk Chocolate' form in the Sweed POS system. The form is divided into three main sections: Basic, Settings, and Prices (Base price). The 'Basic' section includes fields for Name, Former name, SKU, and External barcode. The 'Settings' section includes fields for Package total size, Units in package, Unit size, Total THC, mg/unit, Total CBD, mg/unit, Total THC, mg/serving, and Strength level. The 'Prices' section includes fields for Local tiers, Global tiers, Local price, Global price, Local medical price, and Global medical price. A red arrow points to the 'Total THC, mg/serving' field, which is highlighted with a red box.

33. Select the "Strength level" dropdown to associate a strength level with the variant

The strength levels must be created prior to the creation of the variant in order to be visible in the dropdown. For more information on creating a strength level, please see this [article](#).

The screenshot shows the 'New variant: Kiva Milk Chocolate' form in the Sweed POS system. The form is divided into three main sections: Basic, Settings, and Prices (Base price). The 'Basic' section includes fields for Name, Former name, SKU, and External barcode. The 'Settings' section includes fields for Package total size, Units in package, Unit size, Total THC, mg/unit, Total CBD, mg/unit, Total THC, mg/serving, and Strength level. The 'Prices' section includes fields for Local tiers, Global tiers, Local price, Global price, Local medical price, and Global medical price. A red arrow points to the 'Strength level' dropdown menu, which is highlighted with a red box.

34. Select the "Create identical distributor product" to create an identical distributor product at the creation of the new variant

The screenshot shows the 'Create Product' form in the Sweed POS system. The left sidebar contains navigation links: MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' section is expanded, showing 'Products' as the active tab. The main form area has the following fields and options:

- Former name**: Text input field.
- SKU**: Text input field.
- External barcode**: Text input field.
- Units in package**: Text input field with value '1'.
- Unit size (Package total size / Units in package)**: Dropdown menu.
- Local price**: Text input field with value 'N/A'.
- Global price**: Text input field with placeholder 'Select a size to fill'.
- Local medical price**: Text input field with value 'N/A'.
- Global medical price**: Text input field with placeholder 'Select a size to fill'.
- Total THC, mg/unit**: Text input field.
- Total CBD, mg/unit**: Text input field.
- Total THC, mg/serving**: Text input field.
- Strength level**: Dropdown menu.
- Create identical distributor product**: Toggle switch (currently off).
- Available for purchase type**: Dropdown menu.
- Enabled for E-commerce**: Checkmark (checked).

A red arrow points to the 'Create identical distributor product' toggle switch. At the bottom right, there is a 'Create' button and a chat icon with a notification badge.

35. Select the "Available for purchase type" dropdown to associate a purchase type with the variant

The screenshot shows the 'Create Product' form in the Sweed POS system. The left sidebar contains navigation links: MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. The 'STORE SETUP' section is expanded, showing 'Products' as the active tab. The main form area has the following fields and options:

- Former name**: Text input field.
- SKU**: Text input field.
- External barcode**: Text input field.
- Units in package**: Text input field with value '1'.
- Unit size (Package total size / Units in package)**: Dropdown menu.
- Local price**: Text input field with value 'N/A'.
- Global price**: Text input field with placeholder 'Select a size to fill'.
- Local medical price**: Text input field with value 'N/A'.
- Global medical price**: Text input field with placeholder 'Select a size to fill'.
- Total THC, mg/unit**: Text input field.
- Total CBD, mg/unit**: Text input field.
- Total THC, mg/serving**: Text input field.
- Strength level**: Dropdown menu.
- Create identical distributor product**: Toggle switch (currently off).
- Available for purchase type**: Dropdown menu (highlighted with a red box and arrow).
- Enabled for E-commerce**: Checkmark (checked).

A red arrow points to the 'Available for purchase type' dropdown menu. At the bottom right, there is a 'Create' button and a chat icon with a notification badge.

36. Toggle the "Enabled for E-commerce" checkbox to enable or disable the variant from being sold via E-commerce

The screenshot shows the 'Create Product' form in the Sweed POS system. The left sidebar contains navigation links: MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. Under STORE SETUP, the 'Products' link is selected. The main form area is titled 'Tutorials' and 'Store time 01:30 PM'. It includes fields for 'Former name', 'SKU', 'External barcode', 'Units in package', 'Unit size', 'Local price', 'Global price', 'Local medical price', 'Global medical price', 'Total THC', 'Total CBD', 'Total THC, mg/serving', 'Strength level', and 'Create identical distributor product'. A red arrow points to the 'Enabled for E-commerce' checkbox, which is checked and highlighted with a red box.

37. If applicable, select the "Global tiers" dropdown to associate the variant with a predefined global tier

For more information on creating pricing tiers, please see this [article](#).

The screenshot shows the 'New variant: Kiva Milk Chocolate' form in the Sweed POS system. The left sidebar contains navigation links: MONEY, INVENTORY, CUSTOMERS, E-COMMERCE, ADMIN, MARKETING, and STORE SETUP. Under STORE SETUP, the 'Products' link is selected. The main form area is titled 'Store Setup / Products / Milk Chocolate / Variant' and 'New variant: Kiva Milk Chocolate'. It includes tabs for 'Info' and 'Images'. The form is divided into three sections: 'Basic', 'Settings', and 'Prices (Base price)'. The 'Prices (Base price)' section includes fields for 'Local tiers', 'Global tiers', 'Local price', 'Global price', 'Local medical price', and 'Global medical price'. A red arrow points to the 'Global tiers' dropdown menu, which is highlighted with a red box.

38. Enter the global price for the variant in the "Global price" field. The global price will be the default catalog sales price

For more information on how to override the global price and set a local price, please see this [article](#).

40. Select the "Create" button

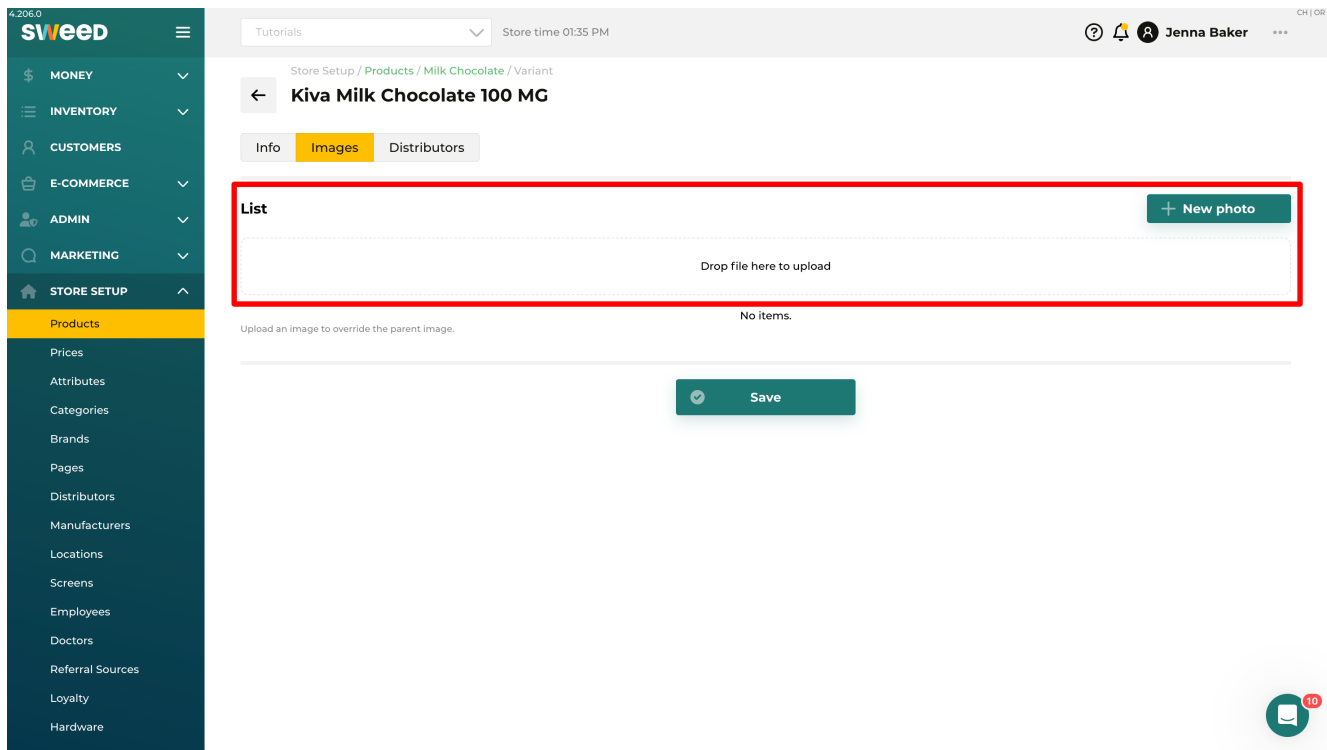

41. Select the "Images" tab to add an image to the variant

41. Select the "Images" tab to add an image to the variant

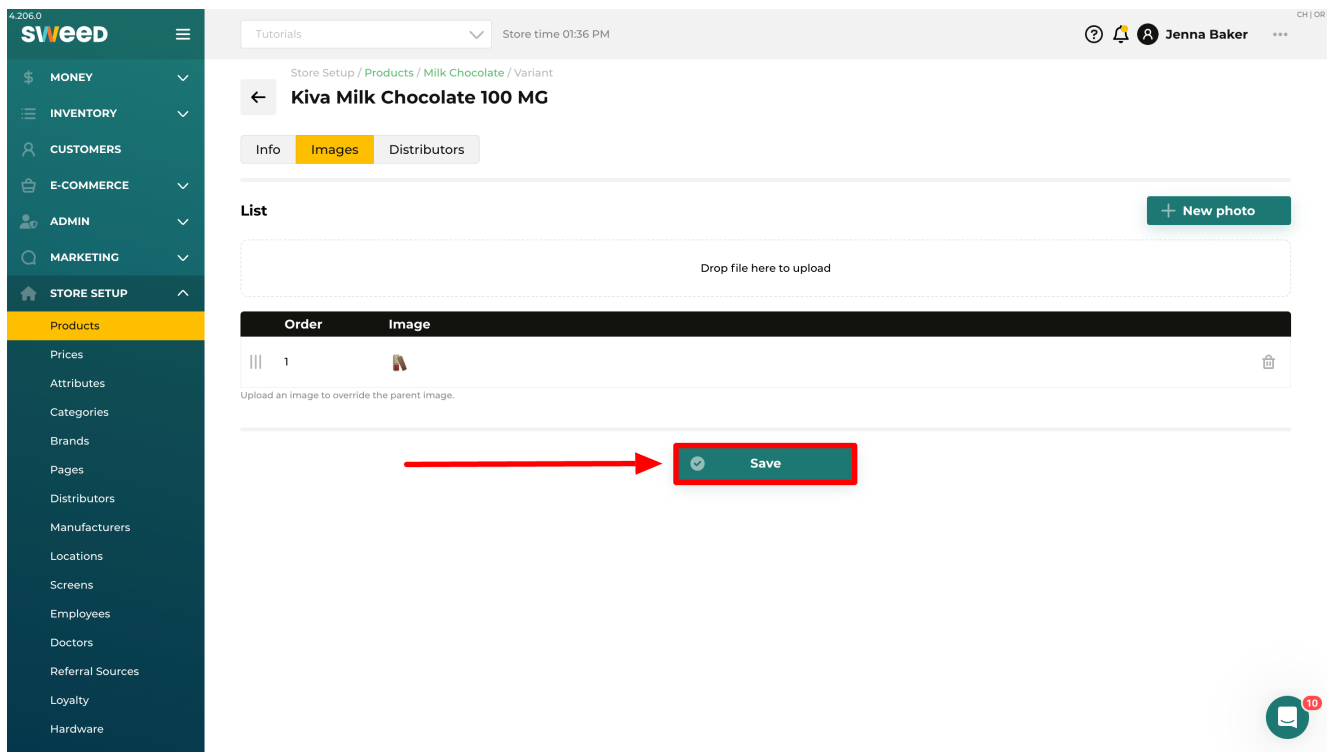

42. Drag and drop an image file into the "Drop file here to upload" field, or select the "New photo" button to add a local image file

42. Drag and drop an image file into the "Drop file here to upload" field, or select the "New photo" button to add a local image file

Note: When uploading images, please ensure to upload either .jpeg or .png file types, all other file types are currently unsupported. Product variant images will be the default image shown. If no variant image has been uploaded, the product image will be displayed in its place.

43. Select the "Save" button to save any changes made

44. If you did not toggle "Create identical distributor product" from [step 33](#), you can create one in the "Distributors" tab by following the steps in this [article](#).

Note: You will need a Distributor product to receive inventory.
